Losses attributable to noncontrolling interests in a subsidiary may exceed the interest in the subsidiary of equity.

Earnings (Losses) Per Share

Basic earnings per share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the year. Fully-diluted earnings per share is computed by dividing net income (loss) by the sum of the weighted-average number of common shares outstanding and the additional common shares that would have been outstanding if potential common shares had been issued. Potential common shares are not included in the computation of fully diluted earnings per share if their effect is antidilutive. The standards under ASC 820 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements. FASB ASC 820 establishes a three-tier fair value hierarchy which prioritizes the inputs used in measuring fair value as follows:

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little of no market data, which require the reporting entity to develop its own assumptions.

The carrying amounts reported in the balance sheets approximate their fair value.

| | Total | Level 1 | Level 2 | Level 3 |
|---------------|-----------------|---------|-----------|---------|
| Common shares | \$ 2,214,782 | 466,404 | 1,748,378 | |
| Total | 2,214,782 | 466,404 | 1,748,378 | |

Those investments without readily determinable fair value are accounted for at cost less any impairment, plus or minus changes resulting from observable price changes in orderly transactions for identical or similar investments of the same issuer, in any, these investments are included in the Level 2 hierarchy above. The investee could sell shares at significantly lower prices or their operations could fail resulting in significant decreases in the investments cost basis. The Company plans to fund its future operations by potential sales of its common stock or by issuing debt securities. However, there is no assurance that the Company will be able to achieve these objectives, therefore substantial doubt about its ability to continue as a going concern exists.

Marketing

Marketing costs are expensed as incurred. Marketing expense for the year ended September 30, 2023 and September 30, 2022 was \$0 and \$36,000 respectively.

New Accounting Pronouncements

Accounting standards that have been issued or proposed by the Financial Accounting Standards Board (õFASBö) that do not require adoption until a future date are not expected to have a material impact on the financial statements upon adoption.
